

SHERIDAN

HOW TO FOLD A FITTED SHEET

A step by step guide to folding your Sheridan fitted sheets neatly.

TIP: It is easiest to work above a large flat surface, such as your bed or a large table. Begin by laying your Sheridan fitted sheet down as shown in Step 1.

Step 1: lay fitted sheet

Lay your Sheridan fitted sheet flat on a large surface with the elastic facing up.

Step 2: matching up the corner seams

Turn the two bottom corners (C & D) inside out and tuck corner C into A, and corner D into B matching the corner seams together. Neaten the corners and edges to make a nice rectangle.

Step 3: fold sheet in half

Fold your Sheridan fitted sheet in half from left to right or vice versa making sure to hide the elastic.

Step 4: fold sheet into thirds

Now fold your Sheridan fitted sheet again this time into thirds forming a long rectangle.

Step 5: fold sheet into square

Finish it off by folding your Sheridan fitted sheet again into thirds from left to right or vice versa creating a square, and you're done!
