

SHERIDAN

Flannelette is created with loosely spun yarn, and the fabric is brushed on each side, making it beautifully soft to the touch.

For long enjoyment of this luxurious product, we recommend you take note of these tips:

Shrinkage

Be aware that 100% cotton fabric will always shrink when washed. We have cut your sheets larger to allow for this inherent shrinkage.

Excess fibre

If you hang your flannelette sheets on the line, give them a gentle flick to remove the excess fibre, a natural occurrence in flannelette fabric. If tumble drying, never use a hot setting, as this can burn the excess fibre and create excessive linting.

Longevity

We recommend a gentle machine wash using a mild detergent. Do not use detergents containing bleach, as this will cause colours to fade and reduce the longevity of your flannelette sheets.

Darker colours

Remove sheets from the washing machine promptly. Although your flannelette sheets are colourfast, darker colours may bleed if left wet or damp for long periods.
